Why International?

GROWTH
Access larger markets, boost volumes and revenue, and earn hard currency to fund scale.

DIVERSIFICATION
Spread risk across countries to reduce dependence on one economy, season, or regulation.

BRAND
Build global credibility for “Product of India,” enabling premium pricing and stronger partnerships.

EFFICIENCY
Higher volumes improve capacity use and lower unit costs in sourcing, production, and logistics.

Why Oman?

CULTURAL FIT
Omani culture aligns with our product; tea is a daily staple across meals and pairings, so baseline demand is strong.

HoReCa REVENUE
Though volume is lower than households, cafés/restaurants generate comparable revenue via better pricing/margins.

READY-MARKET
Oman already imports tea (India/SriLanka/Kenya/UAE), so acceptance and import logistics are established.

CITY-FOCUS
Demand clusters in Muscat, Sohar, and Salalah, enabling a targeted launch and efficient distribution.

Marketing Budget
